

Pipe Cleaner Flowers

Rainy Day Crafts

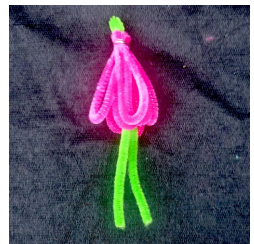

1 green pipe cleaner for the stem
4 coloured pipe cleaners for the flower petals
Fine wire or thread to secure the flower petals.

Bend the green pipe cleaner in half to make the stem.
Cut each coloured pipe cleaner in half to make the flower petals.
Bend each petal in half and twist the ends together slightly to hold its shape.

Attach each petal to the stem with fine wire or thread, about 5 mm below the top of the stem. This will leave a small tip at the top for the flower's stigma.
Leave a little extra wire or thread at the start and end so you can secure it firmly. Arrange the petals evenly around the stem to form your flower.

Bend the flower petals upwards and gently shape them to make your flower look beautiful.

Send us photos of your own creations.
