

Pipe Cleaner Tree

What you need:

4 pipe cleaners, each 300 mm long
About 15 g of wooden beads with holes large enough to thread onto the pipe cleaners

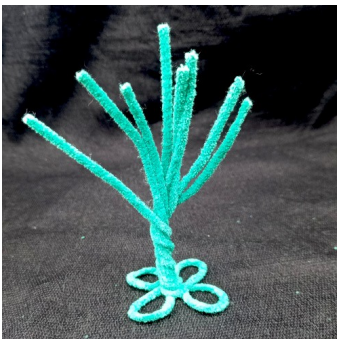

Fold all four pipe cleaners in half.
Twist them together around your finger to form the tree trunk.

Leave about 60–70 mm of each pipe cleaner free at the top. These will become the branches.
Spread the bottom loops apart and flatten them to form the roots. Your tree should now be able to stand on its own!

Thread the wooden beads onto the branches. Bend the tips of the pipe cleaners slightly to stop the beads from falling off.

Send us photos of your own creations.
